# Some of our Recent Work

# Horse AI Brief

**Extra Edge Percentage:**

**Extra Edge Percentage: 85-90%**

**Score Details:**

- Total Detections: 5
- Score: 87.90%

**Detected Classes**

- Good\_Hindquarters\_Muscle
- Good\_Topline
- Good\_Abdomen
- Good\_Hamstring\_Muscle
- Good\_Hamstring\_Muscle

**Uploaded File**

The screenshot shows a video player interface for a horse race. At the top, it displays "THOROUGHBRED CENTRAL", "NOWRA", "1600m", "6min", and "RECORDED". Below the video frame, race details are shown: "6 PRIMARY PURPOSE (2)", "B.M.4 NICCONI LEVENSES", "0:00 / 0:06 PENZA", "T.GREGORY NICKMAN", "57 KG", "TAB 8.00", and "FLUCTUATIONS". At the bottom of the screen, there is a blue button labeled "Predict" and the text "Fitness Score: 100.0%".

The project utilized AI for analyzing horse health through image analysis to enhance efficiency and accuracy, involving research, data collection, model training, and documenting the workflow.

By analyzing body conformation, muscle development, and movement patterns, our system will provide a **quantitative fitness measure**. This technology will revolutionize the equine industry with standardized and efficient evaluation

**Key objectives of this research include:**

**01** **Developing a robust computer vision model capable of accurately identifying and quantifying relevant horse features.**

**02** **Creating a scoring system to assess horse fitness based on extracted features.**

**03** **Validating the system's performance through extensive testing on a diverse dataset.**

# PassportV3

The PassportV3 project aimed to revolutionize the financial sector by utilizing Web3, smart contracts, and DeFi to create a cryptocurrency ecosystem through research, development, and testing for digital token minting and management.

By using Web3, smart contracts, and DeFi, we'll create a **decentralized financial system**. This will revolutionize finance with secure and efficient transactions.

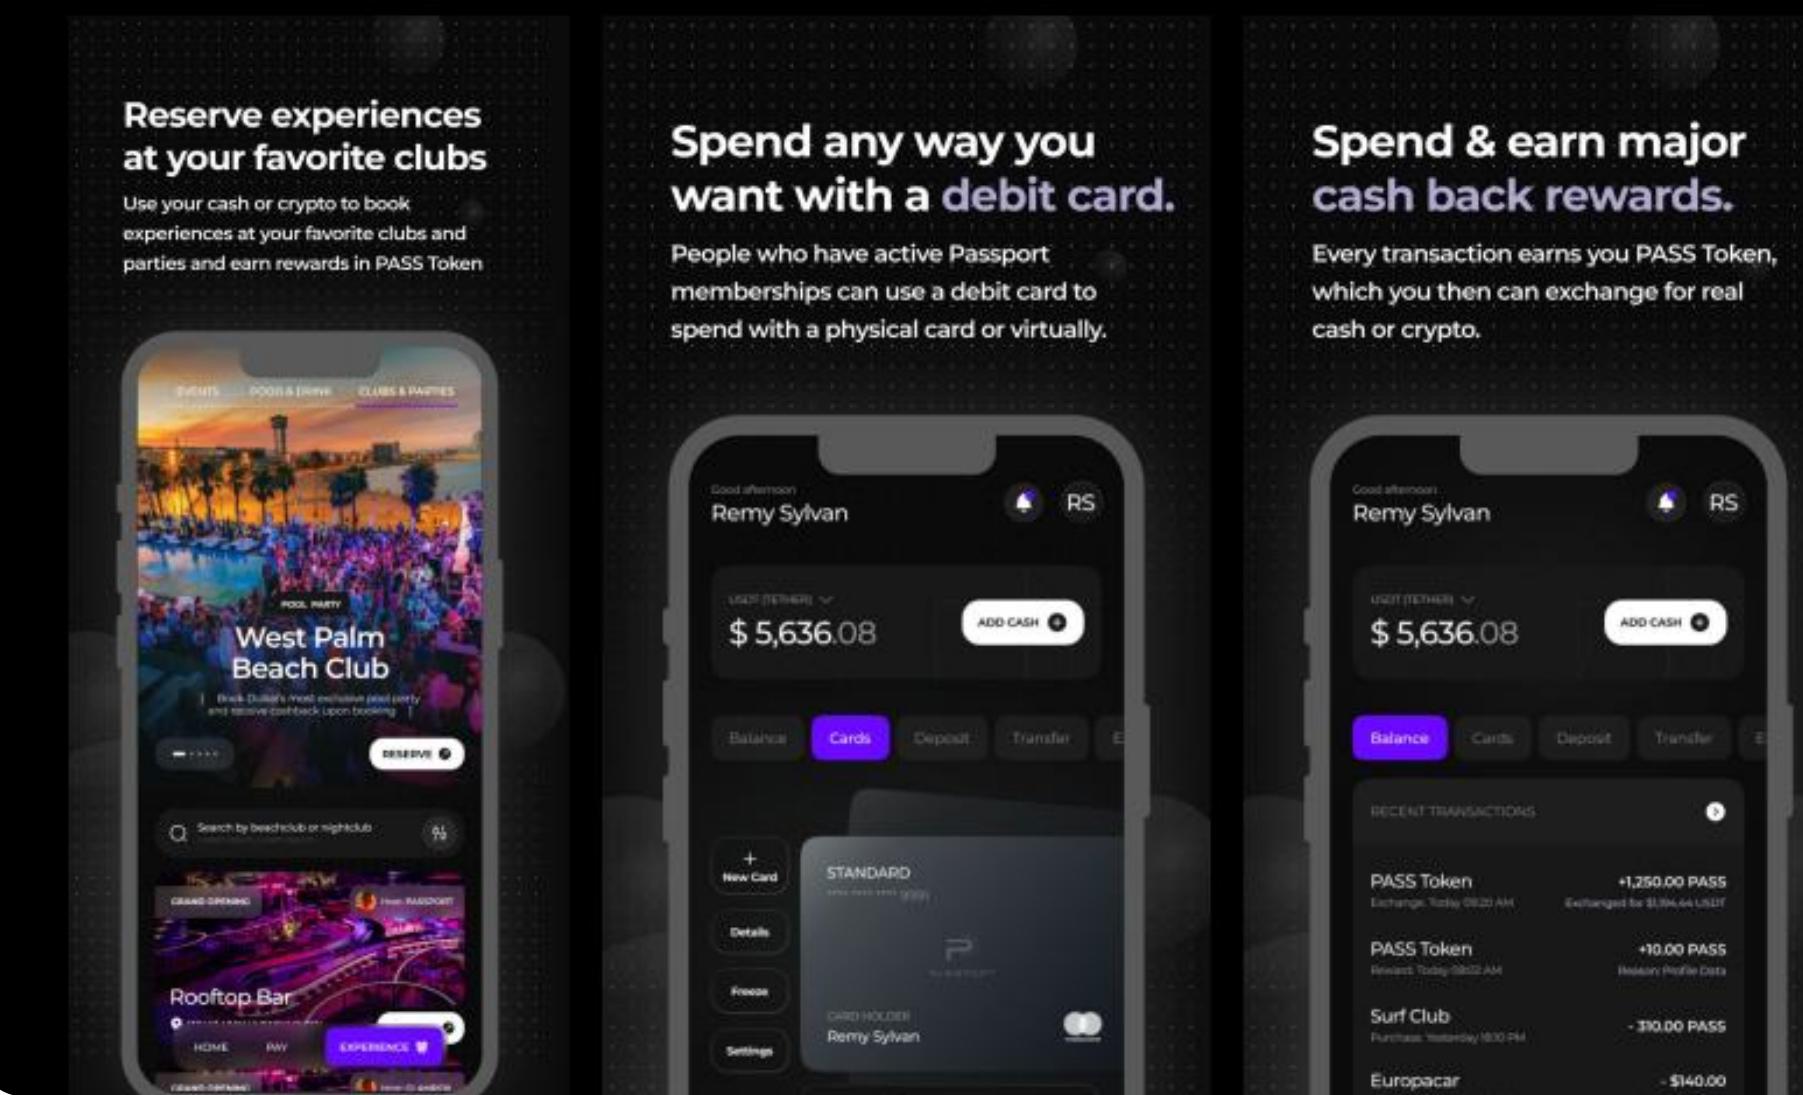

Key objectives of this research include:

**01** Developing a comprehensive token economics framework optimized for distribution, incentives, and utility.

**02** Implementing smart contracts to automate processes and enforce rules.

**03** Ensuring security and compliance through multi-layered protection and extensive testing.
